SELL SHEET

Redheart

Strength Rooted in Nature

Redheart, (aka African Red Ipe) Mukulungu and Afrikulu, prized for its remarkable density, strength and durability, is a hardwood that brings timeless character to any project.

With warm reddish-brown tones and a fine, interlocked grain, Redheart offers both elegance and resilience for demanding outdoor and architectural applications.

Redheart

TROPICAL PRO™
SUSTAINABLE DECKING AND CLADDING

Strength Rooted in Nature

Naturally durable and resistant to decay, this wood is an ideal choice for decking, cladding, and heavy-duty exterior use where performance and aesthetics must go hand in hand.

Beyond its striking appearance, Redheart is valued for its stability and long-term performance. Its dense structure and natural oils make it less prone to warping, cracking, or surface wear, even under harsh climates.

EXTREME HARDNESS & DURABILITY:

Redheart is one of the hardest African hardwoods, offering unmatched strength to endure decades of heavy use, demanding climates, and architectural challenges.

NATURAL RESISTANCE

Its dense fibers and natural oils provide strong defense against insects, mold, and decay, ensuring long-term performance without relying on chemical treatments.

VERSATILE APPLICATIONS

Ideal for decking, cladding, façades, flooring, and large-scale structural projects, Redheart delivers reliability and beauty across both residential and commercial environments.

DISTINCTIVE APPEARANCE

With warm reddish-brown tones and a fine interlocked grain, Redheart stands out for its elegance.

DIMENSIONAL STABILITY

Thanks to its high density and interlocked grain, Redheart shows excellent resistance to warping, shrinking, and surface checking.

SUSTAINABLE AND ECO-FRIENDLY

Harvested under responsible forestry practices, Redheart represents a material that respects natural ecosystems while providing lasting value and excellence.

Natural Color When Installed

Redheart reveals a palette of reddish-brown hues with a fine, interlocked grain that shimmers subtly under light.

Oiled Tone

Treated with oil, its tones deepen into a rich, dark mahogany with glowing highlights, bringing out the wood's depth and character.

Left Unoiled to Weather Naturally

Left to age naturally, Redheart transforms into an elegant silvery-gray patina that softens its appearance while preserving its inherent durability.
