03

Extreme Hardness & Durability

All Tropical Pro hardwoods are exceptionally dense, making them ideal for high-traffic areas and challenging outdoor conditions.

Natural Resistance

Tropical Pro woods are naturally resistant to insects, rot, mold, and fungi—no chemicals needed.

Dimensional Stability

Whether for decking, cladding, or outdoor furniture, **Tropical Pro™** hardwoods are versatile and well-suited for a variety of high-end applications.

Impressive Lifespan

Built to last for decades:
Ipe: Up to 50+ years.
Cumaru & Redheart: 50+ years.
Garapa: 30+ years.
Tigerwood: 25+ years.

Low Maintenance

Minimal upkeep required—resists weathering, wear, and surface degradation better than composites or treated lumber.

Natural Beauty & Aging Options

Each wood matures with grace, offering design flexibility:
Natural Finish: Highlights authentic grain and color.
Oiled Finish: Deepens color, adds a lustrous sheen, and protects against UV.
Weathered Finish: Fades to a timeless silver-gray patina that blends with outdoor environments.

Versatile Applications

These species are suited for a wide range of uses, including:
Decking, cladding, siding, façades, doors, window frames, outdoor furniture, flooring, and architectural elements.

GARAPA

Natures Golden Touch

Garapa hardwood, also known as Golden Ipe or Brazilian Teak, is a true gem with golden to honey-brown hues that deepen over time. Its typical grain can have intriguing interlocks, and its smooth texture and natural luster create a mesmerizing effect, making the wood shimmer and shift in the light.

Beyond its beauty, **Garapa is incredibly durable**, perfect for outdoor projects like decking and cladding, adding both strength and elegance to any space.

IPE

The Pinnacle of Hardwoods

Ipe hardwood, also known as Brazilian Walnut, is one of the most durable hardwoods available, making it the ideal choice for a variety of outdoor applications such as decking and cladding.

Known for its rich, dark tones and tight grain, Ipe is not only aesthetically striking but also incredibly resistant to weathering, insects, and mold, ensuring long-lasting beauty and performance.

SUSTAINABLE

CUMARU

Grain of Distinction

Cumaru, also known as Brazilian Teak, Dipteryx Odorata and Tonka, is an exceptional hardwood prized for its versatility and remarkable qualities. Ideal for exterior applications such as decks and cladding. Cumaru enhances outdoor spaces with its rich golden tan to reddish-brown hues and dark grain accents.

Its natural resistance to rot, decay, and insect infiltration makes it the perfect choice for decking & cladding and more!

TIGERWOOD

Exotic Elegance in Every Stripe

Tigerwood, named for its striking golden-brown hues paired with dark brown streaks, is one of the densest and most durable exotic hardwoods available. Its unique appearance, with vivid contrasts that mimic the wild beauty of the rainforest, makes it an exceptional choice for both interior and exterior applications.

Known for its strength and resilience, Tigerwood offers a luxurious, one-of-a-kind look, ideal for decking, cladding, and furniture.

SUSTAINABLE

Pedestals

Installation Precision, performance, and flexibility — from the ground up, with easy to install pedestal systems built for speed and stability.

Tropical Pro Pedestals unique designs simplify installation directly onto any surface including rubber roof membranes.

— Roof decks simplified.

— For use with Tropical Pro Deck Tiles and conventional wood decking.

— Simplified system - all heights in just 4 supports and one height extension.

— Faster installation than other pedestal systems.

— PR system height range 9/16" 10mm to 37" 945mm.

— Base design saves time during installation.

— 3 Head options.

— Self leveling 0 to 5%.

— System micro height adjustment post installation.

— Locking system option to convert self leveling head to fixed head.

— 5/4x4 hardwood, 2x4 treated wood or aluminum stringer options.

— Ideal for dry space deck builds.

— Reusable and recyclable.

Defined by Precision, Guided by Design

Our architectural custom milling services are designed to support projects where precision, consistency, and material integrity are essential. We work with premium hardwoods to produce accurately milled components that meet the technical and aesthetic requirements of high-level architectural applications.

From standard profiles to fully customized solutions, our milling processes ensure tight tolerances, repeatability, and dimensional stability—allowing architects and builders to execute their designs with confidence.

Engineered for Performance

Every milling operation is carefully controlled to respect the natural characteristics of the wood while achieving the exact specifications required for installation efficiency and long-term performance.

Our approach combines advanced machinery with experienced craftsmanship to deliver reliable results across small-scale and large-volume projects.

Services & Capabilities

Custom architectural profiles

Precision ripping and resawing

Dressed two-sides and four-sides

CNC milling for complex geometries

Consistent tolerances for scalable production

We mill a curated selection of architectural-grade hardwoods—including Teak, Redheart, Tanimbuca, Ipe, Cumaru, and other premium species—chosen for their structural integrity, stability, and visual quality.

Architectural custom milling services designed to translate architectural vision into precise, build-ready components.

Premium Tropical Pro™ Maintenance Products and Accessories.

Tropical Pro™ Accessories compliment the high end premium grade architectural quality of our Tropical Pro™ Decking and Cladding Wood Products, with accessories that were developed to provide the best possible outcome whether you are a professional or a do it yourselfer.

The containers that all these products come in are **durable and recyclable.**

The Tropical Pro Difference

Most fastener companies are not concerned whether or not the cheap driver bits they include strip out, or the drill bits supplied are designed to remove wood debris from the hole your drilling, or drill stops and depth setter tools are supplied to prevent you from over torquing and splitting your boards, or that drilling guides are provided to make sure you drill the correct angle when installing deck clips into hardwood decking, or that countersinks are supplied that make sure your screw head doesn't stick up above the deck surface, or that you have enough glue nozzles to allow you to start and stop your plug installation without worrying if the glue in the nozzle will be hard as a rock after you take a lunch break... WE DO!

There is nothing more frustrating than work stoppage because you have to run to the store to get more of something. Time is money an at TFP we have designed our products to protect your time.

Our Fastener Kits include tools designed to execute the installation of the fasteners without failure before the quantity of fasteners included in the kit have been installed.

The use of naturally durable hardwood decking with decades of expected service life required the development of a fastener of incredible performance. The Tropical Pro Boardwalk screw remains the standard for commercial decking application to this day.

Finishes

Tropical Pro™ Deck & Cladding Oil (Low VOC) is a professional-grade oil-based finish specifically designed to protect and enhance exterior hardwoods such as Ipe, Garapa, Cumaru and Tigerwood.

Its deep-penetrating formula does not raise the wood grain, provides superior durability, and highlights the natural beauty of the wood with a completely natural-looking finish.

AKB-000100

DECK & CLADDING OIL
(Low VOC formula) 250 SQ. FT. (23.22m²)

This product is an oil-based natural wood finish specifically designed for use on exterior hardwood decks and cladding. Tropical Pro™ Professional Grade Decking & Cladding Oil (Low VOC Formula) does not raise the grain of the wood and provides excellent penetration.

Cleaners

Tropical Pro™ Cleaner (Part A) and Brightener (Part B) are a professional two-step system designed to prepare natural wood decks and cladding.

The cleaner removes dirt and mildew, while the brightener restores the wood's natural color and enhances grain visibility. Both are easy-to-mix powders and cover up to 1,200 sq. ft., ensuring the wood is ready for oil treatment.

Power Washers can be used to rinse after cleaning and brightening while being careful not to tear wood fiber.

AKB-000101

Wood Deck & Cladding Cleaner
(Part A) 1200 SQ. FT. (111.5m²)

Boardwalk Screws

Engineers who build boardwalks and piers understand the importance of the deck fasteners they specify. Commercial Decking projects designed for heavy pedestrian and vehicular loads need a fastener designed for the application.
Boardwalk Screw #18 X 3.5"
T302 Stainless Steel

Tropical Pro™ Professional Grade Boardwalk Screw #18 X 3.5" T302 Stainless Steel should be used when face fastening 2" (net 1.5"/ 38mm) hardwood or softwood decking to treated wood or hardwood stringers.
