## GARAPA

Natures Golden Touch

**Garapa hardwood**, also known as Golden Ipe or Brazilian Teak, is a true gem with golden to honey-brown hues that deepen over time. Its typical grain can have intriguing interlocks, and its smooth texture and natural luster create a mesmerizing effect, making the wood shimmer and shift in the light.

Beyond its beauty, **Garapa is incredibly durable**, perfect for outdoor projects like decking and cladding, adding both strength and elegance to any space.

**TROPICAL PRO™**  
SUSTAINABLE DECKING AND CLADDING

## The Golden Touch of Nature

Unveil the beauty of **Garapa hardwood**, a stunning choice for modern architecture that boasts natural resilience against mold and decay. Its exquisite range of tones, from soft pale yellow to a radiant golden hue, enhances any space with an air of sophistication and timeless elegance.

Like teak, Garapa is high in silica content which is why it greys so beautifully.

### EXTREME HARDNESS & DURABILITY:

Garapa hardwood offers unmatched hardness, making it an ideal choice for a wide variety of construction projects.

### STRENGTH - SPAN

Garapa Decking will span 24" on center at 100lbs per sq. ft. live load. Meets all international building codes.

### VERSATILE APPLICATIONS

Perfect for stunning decking and cladding applications or go one step further for doors, window frames and outdoor furniture.

### 30+ YEAR LIFESPAN

Invest in Garapa for long-lasting performance —say goodbye to frequent replacements and enjoy decades of durability.

### GREAT VALUE

For those seeking cost-effective lumber with excellent strength, durability, and hardness properties.

### OUTSTANDING RESISTANCE

With excellent resistance to fungi, termites, and rot, Garapa is perfect for outdoor environments and has an "A" fire resistance rating.

### Garapa is Photosensitive

Freshly installed, the boards reveal their authentic tones and grains, radiating warmth and inviting nature into your space. As time goes on, Garapa matures to a more even deeper golden hue.

### Oiled and Exposed to UV

Oiling enhances the rich hues and provides UV protection, deepening the color and adding a natural luster that elevates visual appeal.

### Left Unoiled to Weather Naturally

When left unoiled, the boards develop a distinctive silvery-gray patina over time, showcasing their character and resilience against the elements.
